Inspire the Next

Ink Jet Printer

UX Series

UX-D150W / UX-D110W / UX-D140W

THE WIDE WORLD

The world leader in coding

Hitachi, which manufactured the first Japanese industrial inkjet printer in 1975, has boasted of a high achievement worldwide ever since, not to mention the Japanese market, as a reliable and leading brand of coding.

Hitachi industrial IJ printer UX Series is a global model with highly evolved “Reliability”, “Simplicity”, and even “Eco-friendly” performance.

We will change the coding scene of the world.

**Higher functionality and easier installation
for a variety of printing needs.**

**Its evolution has also realized ease of
use and maintainability.**

Hitachi industrial IJ printers are high-speed printers adopting a non-contact type of printing method, in which the drops of ink fly in the air. It can print on a variety of products manufactured on production lines, which are made of metals, plastics, films, papers, etc. Its speed, flexibility, reliability, and durability are really impressive. Durability in harsh environment and ease of use have also been greatly improved. We are bringing excitement to the coding and marking industry.

Feature [1]

ECOLOGY

Environmentally friendly
while realizing
a low running cost

環

Hitachi original Makeup fluid consumption reduction system has Significantly-reduced running cost.

The ink recovery control and device temperature control provided by the new technology of Makeup fluid consumption reduction system suppress the amount of makeup vaporized and achieve industry-leading levels of makeup consumption.

Reduction of makeup fluid consumption

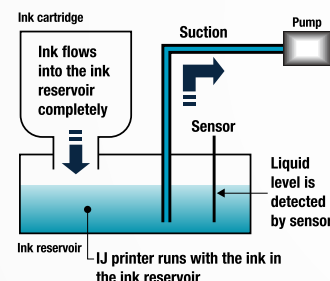

UX-B, UX-D

* With 1067K ink at 20°C.

Eco-friendly because the ink and the makeup fluid in the cartridge can be consumed right up to the last drop.

It is not necessary to stop the production line to replace the cartridges. An eco-system of a simple cartridge-type bottle can be replaced after the ink or makeup fluid is completely consumed and is also easily disposed of.

Each part can be replaced separately, and filter replacement is also easy.

The IJ printer is so designed that the minimal part or module can be replaced rather than replacing the whole unit. The ink filter can also be removed and replaced easily without any tools just by rotating the joint. It's a one-touch operation.

Feature [2]

RELIABILITY

High reliability, and
reassured maintenance
and service networks

信

Designed for harsh environments

The stainless steel cabinet offers IP65 and allows a wash-down with pressured water and industrial detergent, to meet any environment and hygiene requests. The UX Series with IP65 protection is the ideal choice for applications in the meat and dairy sectors.

Automatic nozzle cleaning / Nozzle backwash

Automatic cleaning starts by one press of a button and there is no need to wait for its completion since the power turns off automatically when it is finished. Even if the nozzle gets clogged, it can be easily recovered by the nozzle backwash function that is opposite of the normal ink ejection, in which the fluid is sucked through the nozzle.

■ Automatic nozzle cleaning

Press [STOP]

Automatic cleaning starts and then the power turns off automatically when cleaning completes.

■ Operation screen of nozzle backwash

Made in Japan

Hitachi industrial IJ printers are manufactured with the know-how and technology that have been accumulated since 1975 in Hitachi City where Hitachi was first founded.

After production, all printers have to pass Hitachi's strict quality management before shipment. We provide quality products to our customers worldwide.

USABILITY

Simple touch panel
operation and
maintainability

操

Totally-new user interface!

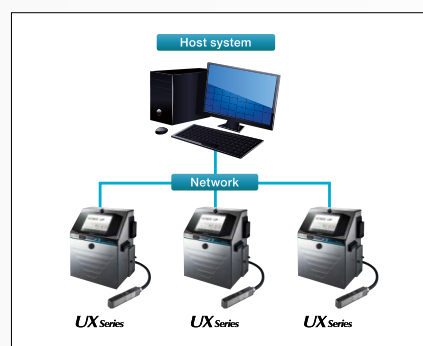

Intuitive operations with a new readily-understandable screen design is now adopted. Most of the operations can be completed on one screen with a simplified and well-arranged design. Complicated operations are not required to obtain the necessary information thereby improving usability.

Enhanced network functionality by improving compatibility with the host system

Configuration of an IoT* system can be smoothly realized using simple wiring because of the standard Ethernet feature and open network compatibility. By collectively managing multiple devices from the host system, the information gathering and operations become more efficient.

* Internet of Things

Note: UX-B is excluded.

Ink conditioning management to maintain print quality

By monitoring both the ink viscosity and the ink consumption, the ink viscosity is always kept in the best condition.

Print sample without ink conditioning

Print sample with ink conditioning

Excellent printhead shape

Tapered shape at the tip of the printhead reduces the distance between the work and the printhead. Printing to the lower position is now made possible. The printhead with anti-corrosion plating keeps working in severe environment.

* Corresponding models: For small characters and high-speed printing

New printing technology, 6-line print compatible for a wider variety of needs

6-line print from one printhead is made possible.

Even with multiple print lines, Hitachi original interlaced-print-control system makes each printed character appear clearly.

For single-line high-speed printing, its print quality is improved with the new print control system.

* Corresponding models: For small characters

■ Barcode reader connection function

Barcode content read by the barcode reader is transmitted as Character strings and set as print content.

s---

Barcode content read by the barcode reader is treated as Call up code and the print data corresponding to the Call up code will be called up.

■-Special communication functions and External signal functions

Function	Detail
Print content output	Outputs Print content to an external device via serial communication when the printer receives an Inquiry about print content from an external device or right after completion of printing.
Print completion code output	Outputs Print completion code to an external device right after completion of printing.
Status output	Outputs IJ printer status to an external device when operation status changes or an Inquiry about status from an external device is received.
External signal count	Update count according to the external signal.

Function	Detail
Print content switching	Print content, which is sent via communication and stored temporarily, will be printed at the time of external signal input.
Output on calendar update	Outputs signal when the print content is updated by the calendar.
External signal reset	Print content of the count digit is set to a reset value at the input of an external signal.
Calling up print data	Calls up registered print data by external signal.
Output notifying completion of signal input	When an external signal of the count, reset, print content switching or print data call up is input, signal will be output.

Vision system

Good partner to improve printing reliability

Instantly checks for print errors of date, serial number, etc. Hitachi original cross-check inspection method (Adjustable matching method) is adopted so that the recognition close to the human eyes is made possible.

Item		High-speed printing	Larger Small-size Characters	Micro Characters
		UX-D150W	UX-D110W	UX-D140W
Nozzle size		55µm	100µm	40µm
Max. print line number		Up to 4 lines		
Maximum number of print characters		Up to 1,000 characters		
Font (Horizontal x Vertical)	4 × 5	✓		
	5 × 5	✓		
	5 × 7(8), 9 × 7(8)	✓		
	7 × 10	✓		
	11 × 11	—		✓ (Chinese only)
	12 × 16	✓		
	18 × 24	✓ *2	✓	
	24 × 32	—	✓	
Character height		2-8mm	3-15mm	1-5mm
Display & input device		WYSIWYG design Display: TFT LCD (10.4 color), backlight provided Input device: Touch panel, input sound provided		
Screen language (2 languages selectable)		English, Chinese, Korean, Thai, Vietnamese, German, French, Dutch, Italian, Spanish, Portuguese, Swedish, Danish, Greek, Russian, Czech, Polish, Arabic, Serbian, Turkish, Hungarian, Bulgarian, Catalan, Romanian, Finnish, Norwegian, Slovenian		
Maximum print rate (Characters per second) (Font 5x5, space 1, 1 line)		Up to 3,173	Up to 468	Up to 3,030
Standard characters		Alphanumeric (A-Z, a-z, 0-9), symbols (27) and space: Total 90		
User pattern		200 patterns each for dot matrix		
Print functions		Calendar, Count, Font mixture, Password		
Barcode printing		code39, ITF, NW-7, EAN-13, EAN-8, UPC-A, UPC-E, code128/EAN-128, GS-1 DataBar		
2D code printing		Data Matrix (Alphabet: 49 characters/Numerals: 98 characters), QR code*2, Micro QR code		
Message storage capacity		300 messages [Option : Up to 2,000 messages (Depends on data content)]		
Input signal		Print target detection, Printing stop, Rotary encoder pulse, Reciprocatve printing, Remote control (Run, Stop, High-voltage ON/OFF, Reset), (NPN/PNP Selectable)		
Output signal		Print in progress or Print complete, Online (NPN/PNP Selectable), Print ready, Fault, Warning (NPN Only)		
Data interface		RS-232C at baud rates selectable up to 115,200bps		
Ethernet (Modbus communication)		IEEE802.3 , 100BASE-T		
External memory		USB for user data storage		
Printhead cable length / angle		4m (in-line/90 degrees)		
Operating temperature range		0-40°C (1067K Ink)	0-35°C (1067K Ink)	
Operating humidity range		30-90% RH (no condensation)		
Power supply (Automatic voltage selection)		AC100-120/220-240V±10% 50/60Hz 120VA		
Approval		CE, UL, cUL, C-Tick, FCC, ICES		
Dimensions (Width x Depth x Height)		400 x 320 x 527 mm		
International protection		IP65		
Approximate weight		27Kg
